

Sole engineer of the ~230,000-line ERP and automation platform Amax Leather Canada and Aurora Furniture MFG run their daily operations on — schema, backend, front end, deployments and the pager. Ships the whole stack: an in-house GPT assistant, EDI and accounting integrations, compliance document pipelines and a multi-tenant dealer portal.

~230,000 LINES IN PRODUCTION	1,048 REST ENDPOINTS	274 MYSQL TABLES	150 FRONT-END PAGES	124 PERMISSION CHECKS

EXPERIENCE

MAY 2025 –
PRESENT

IT Systems & Infrastructure Specialist

Amax Leather Canada Ltd. & Aurora Furniture MFG · Delta, BC

- Sole engineer of the ERP platform two operating companies run on daily: 77 Node/Express route modules, 1,048 REST endpoints, 24 services, 150 pages and 139 front-end JS modules — ~230,000 lines in production.
- Designed the data layer across 4 MySQL databases and 274 tables. The primary sits overseas on a slow link, so batching, a local read mirror and caching — not CRUD — are the real work; tens of thousands of orders flow through it.
- Built **AmaxBot**, an in-house GPT assistant: a chat UI with 55 function-calling tools plus a 3,300-line IMAP bot serving 27 email commands, knowledge-base auto-replies and a daily digest. Its tool catalog is filtered by role before it reaches the model, so a non-admin request never contains a write tool.
- Shipped hybrid semantic + full-text knowledge-base search over 26 articles: the old index returned rows for five of eight real questions, the hybrid the correct article for all eight, including three Chinese ones it could not read.
- Integrated the platform outward: EDI over SOAP with an EDI provider (purchase orders, acknowledgements, ASNs, invoices) and an accounting hub of 6 connectors and 42 APIs; pushes are idempotent, so a resend cannot double-post.
- Enforced role-based access control through 124 permission checks, shipped every page bilingually (EN/ZH), and run the servers, deployments, monitoring, 726 operational scripts and the AWS footprint.

AUG 2022 –
APR 2025

System Administrator

Amax Leather Canada Ltd. · Delta, BC

- Ran the server, network and Google Workspace estate plus the AWS footprint (EC2, S3, IAM) behind internal apps.
- Hardened email and DNS with SPF/DKIM/DMARC, ran security audits, phishing defence and FortiGate firewalls.
- Built the first LLM-integrated internal tools and maintained the API and EDI links to warehouse and partners.

MAY 2022 –
MAR 2023

Website Developer

Perfect Decor · Burnaby, BC

- Built custom client websites and web applications end to end, from layout through deployment.
- Added features and responsive redesigns to existing client sites, improving usability on mobile.

SELECTED PROJECTS

- Dealer Portal

Public-facing portal for the dealer network: per-dealer catalogs, price lists, branding and photo-upload claims. The hard part is tenancy — every query is scoped so one account can never read another's data.
- Warehouse Docs

Eight document types with Excel and PDF generation, five email flows and timber-legality compliance, driven off the same order hub the rest of the platform reads — one source of truth, no re-keying.
- Social Video

Standalone Node app that turns a Mandarin script into a finished 9:16 social video: text-to-speech, imagery, burned-in subtitles and FFmpeg assembly, with subtitle timing aligned to the synthesised speech.

CORE SKILLS

- Languages

JavaScript (ES2020+), Node.js, Python, SQL, HTML5, CSS3, Bash / PowerShell
- Backend

Express, REST API design (1,048 endpoints), 24 services / 22 utils, node-cron, IMAP & SMTP, SOAP & EDI, Puppeteer
- Front End

Vanilla-JS SPA architecture, shared design system & component CSS, Bootstrap, bilingual i18n (EN/ZH), PWA
- Data

MySQL schema design (274 tables), query optimisation, read-mirror replication, caching, Excel/CSV pipelines
- AI

LLM function calling (55 tools), role-scoped tool catalogs, embeddings & hybrid retrieval, NL-to-SQL, OCR
- Cloud & Infra

AWS (EC2, S3, IAM), Windows & Linux administration, PM2, deployments, monitoring, 726 operational scripts
- Security

RBAC (124 permission checks), OTP / 2FA, session & CSRF handling, SPF/DKIM/DMARC, FortiGate, auditing

EDUCATION & CERTIFICATION

- DEC 2024

Master of Science in Cybersecurity

New York Institute of Technology — network security, cryptography, ethical hacking
- JAN 2023

Bachelor of Technology in Information Technology (CO-OP)

Kwantlen Polytechnic University — 3.8 GPA in major; web application development, cloud & website security

Certifications AWS Cloud Foundations · Fortinet FortiGate 7.6 Administrator · Fortinet Google Cloud Security 7.6 Administrator · Fortinet Certified Associate Cybersecurity 1.0 · Fortinet Cybersecurity 2.0
