

IT systems and infrastructure engineer with an **MSc in Cybersecurity**. Four years running the servers, network, cloud and Google Workspace estate of two furniture manufacturers — and, since 2025, **sole engineer** of the ERP and automation platform both companies run their day on, end to end.

EXPERIENCE

MAY 2025 –
PRESENT

IT Systems & Infrastructure Specialist

Amax Leather Canada Ltd. & Aurora Furniture MFG · Delta, BC

- Sole engineer of the ERP platform both companies run on daily: **1,048 REST endpoints** across 77 Node/Express modules, 150 pages, 4 MySQL databases and **274 tables**, bilingual EN/ZH, ~230,000 lines in production. The primary database sits overseas, so batching, a local read mirror and caching — not CRUD — are the real work.
- Built **AmaxBot**, an in-house GPT assistant: a chat UI with 55 function-calling tools plus a 3,300-line IMAP service answering 27 email commands. Its tool catalog is filtered by role before it reaches the model, so a non-admin request never contains a write tool.
- Integrated the platform outward — EDI over SOAP with an EDI provider (POs, acknowledgments, ASNs, invoices) and an accounting hub of 6 connectors and 42 APIs. Every push is idempotent and keyed on the document number, so a resend cannot double-post.
- Own production: Windows and Linux servers, the AWS footprint, deployments, monitoring, backups and 726 operational scripts, with access enforced through 124 role-based permission checks.

AUG 2022 –
APR 2025

System Administrator

Amax Leather Canada Ltd. · Delta, BC

- Administered the server estate — Windows and Linux, virtualization, storage, backup and restore — and the office and warehouse network across FortiGate firewalls, VPN, switching and Wi-Fi.
- Ran Google Workspace for the group (accounts, groups, shared drives, endpoint and mobile policy) and the DNS estate; hardened mail with SPF, DKIM and DMARC and added ML-assisted phishing screening.
- Built and maintained the AWS footprint (EC2, S3, IAM) behind internal applications, plus the API and EDI links to the warehouse and trading partners and the databases behind them.
- Ran security audits, vulnerability remediation and data-protection work, and provided day-to-day technical support and incident response for staff across offices and warehouses.

MAY 2022 –
MAR 2023

Website Developer

Perfect Décor · Burnaby, BC

- Built custom websites and large-scale web applications for clients end to end, from layout and imagery through deployment.
- Revised existing client sites and web stores with new features and responsive redesigns, improving usability on mobile.

SELECTED PROJECTS

Dealer Portal

Customer-facing portal for the dealer network: per-dealer catalogs, price lists, branding and photo-upload claims. Every query is tenancy-scoped, so one account can never read another's data.

Warehouse Docs

Eight document types with Excel and PDF generation, five email flows and timber-legality compliance, all driven off the same order hub the rest of the platform reads.

Social Video

Standalone Node app that turns a Mandarin script into a finished 9:16 video: text-to-speech, imagery, burned-in subtitles and FFmpeg assembly, with caption timing aligned to measured audio.

CORE SKILLS

Languages

JavaScript (ES2020+), Node.js, Python, SQL, HTML5, CSS3, Bash / PowerShell

Backend

Express, REST API design, services & scheduled jobs, IMAP & SMTP, SOAP & EDI, Puppeteer / Playwright

Front End

Vanilla-JS SPA architecture, shared design system & component CSS, Bootstrap, bilingual i18n (EN/ZH), PWA

Data

MySQL schema design, query optimization, read-mirror replication, caching, backup/restore, Excel & CSV pipelines

AI

LLM function calling, role-scoped tool catalogs, embeddings & hybrid retrieval, NL-to-SQL, OCR, prompt design

Infrastructure

AWS (EC2, S3, IAM), Windows & Linux administration, Google Workspace, PM2, deployments, monitoring, backups

Security &

Network

RBAC, OTP / 2FA, session & CSRF handling, SPF/DKIM/DMARC, FortiGate, VPN, DNS, auditing, incident response

EDUCATION & CERTIFICATION

DEC 2024

Master of Science in Cybersecurity · GPA 3.74

New York Institute of Technology — network security, cryptography, ethical hacking

DEC 2022

Bachelor of Technology in Information Technology (CO-OP) · 3.8 GPA in major

Kwantlen Polytechnic University — web application development, IoT, website & cloud security

Certifications

AWS Cloud Foundations · Fortinet FortiGate 7.6 Administrator · Fortinet Google Cloud Security 7.6 Administrator ·

Fortinet Certified Associate Cybersecurity 1.0 · Fortinet Cybersecurity 2.0
